

Chat ID: 5822499. Question: Provider: Bluehost - My Domain is: "tutorsforkidsinc.org" I presently host a couple of WordPress sites through bluehost. I have a nonprofit organization who currently has a static site and I've offered to get them started with a very basic WordPress site. This is a very small organization which is likely to only have a few hundred visits PER MONTH. At this time I don't think they will be using email at all. Can you run WordPress on the basic \$5.99 shared service or do you have to go with the full WordPress package?
